

# Herrman Happenings

## December

Ms. Sprain's friends have been working on nonfiction reading. They practiced taking notes and creating posters to share! Here's a look at the process they used to create their presentations or posters!

Special Education

*Step one: Read 2 books and take notes. Step two: Turn the notes into full sentences. Step three: Organize information and create posters!*

Our friends have been working hard on growing their reading levels, building their fluency & confidence, and love of reading.

*Interventionists*

In Science, Mrs. Centeno's class learned the connection between sound and vibration. They experimented how far a whisper can travel.

*Fourth Grade*

In Science, Mrs. Pingel's class learned about what kind of animals there might be in the future. The students created their own futuristic animals.

*Third Grade*

Second Graders have been learning about Nonfiction writing by making How-to stories. Mrs. Jungmann used their directions to make Peanut Butter and Jelly Sandwiches. Too bad that many of the students forget to add using a plate or a knife.

*Second Grade*

First Graders have been traveling the world learning about how other countries celebrate the holidays! Each trip they got to see real pictures of beautiful decorations, festivities, traditions, and the unique foods from each country. Students even got to put together a special souvenir that represents an important holiday symbol. They've traveled to Canada, Germany, Mexico, and England. Next week, we will be finishing up our Worldwide Round Trip to the countries of Sweden and Italy. It has been an unforgettable journey so far and the kids are really enjoying all the knowledge they are gaining from this experience.

*First Grade*
